THE OZONE AND SUN CARE FOR YOUR CHILD

The ozone layer is a layer of atmospheric gases that surrounds the earth we live on. This "blanket of gases" protects us from the sun's powerful ultraviolet rays, which are extremely damaging to life on this planet including the lives of our children. Yet, even now the ozone layer is slowly thinning due to certain chemicals present in out air.

Industrial chemicals, such as CFCs (chlorofluorocarbons), have been eroding the earth's ozone layer for the past decade. These chemicals were recently present in many aerosol cans and Styrofoam products but as a result of increased awareness throughout our society, these chemicals have been reduced. Also the exhaust fumes from all our cars and buses have contributed to the destruction of our ozone layer. This is truly concerning as we struggle with the idea of trying to locate environmentally friendly means of transportation.

Many scientists are concerned that our world will be greatly affected should the ozone layer continue to deteriorate. They are worried that the number of skin cancer incidents as well as severe sunburns, directly caused by the sun's damaging ultraviolet rays, will continue to rise.

We can watch for products that are "ozone friendly" as well as those products that aren't. If we work together to help our ozone layer, then our world will be a safer place for us and our children.

Because of the thinning of our ozone layer, the sun's harmful rays are penetrating the layer more easily. This gives everyone cause for concern as incidents of skin cancer as well as severe sunburns are not fun! These can be avoided by following a few simple steps in order to keep everyone healthy and happy.

CONSENT FORM FOR SUNSCREEN (Signed yearly)

Parent / Guardian:

I, _____ give permission to the daycare provider to apply
Last name First

_____ to my child (ren): _____
(name of sunscreen) name(s) of child (ren)
as required and before outdoor play, trips or walks.

I also will supply sunscreen, labeled with child (ren) name.
The caregiver will stop applying sunscreen to the child if any reaction occurs.
The parent will be informed immediately.

_____ _____
(Parent/Guardian signature) (Date)
